

Nakul Kalani

+91-9081079495 | nakuldarji95@gmail.com | github.com/Nakul6969

PROFILE

Aspiring Data Scientist and ML Engineer with hands-on experience in Python, SQL, and building dashboards with Power BI.

SKILLS

Technical: Python, SQL, Pandas, MongoDB, Data Visualization, Gen AI, Machine Learning

Tools: Power BI, Excel, Tableau, Gen AI Tools

EDUCATION

B.Tech in Computer Science And Engineering (AI) — Parul University, Vadodara 2023 – 2027

Relevant coursework: Data Science, Machine Learning, Software Development

12th GSHSEB — Alpha High School, Junagadh 2023 | 79.6 PR

10th GSEB — Noble High School, Junagadh 2021 | 86.9 PR

CERTIFICATIONS

- Career Essentials in Data Analysis – Linked-In Learning & Microsoft
- Certificate - [Link](#)

PROJECTS

Car Price Predictor

- Built a Machine Learning model using XGBoost Regressor to predict car price
- Implemented end-to-end pipeline: data encoding, model training, and user input prediction
- Achieved R^2 score of 0.97 with MAE of \$3,018 on real-world car data-set
- Git-hub Project [Link](#)

Stock Trend Predictor

- Built a stock analysis website using Python and Stream-lit for smart investing using ML-based technical analysis
- Used Random Forest algorithm, well-suited for non-linear risk patterns in stock data
- deployed as a live web application [Link](#)

US Supermarket Analysis

- Built an interactive Power BI dashboard to analyze supermarket sales; performed data cleaning using Pandas
- Identified key insights: top-selling products, regional sales, and seasonal trends
- Git-hub Project [Link](#)

EXPERIENCE

Self-Taught Machine Learning Developer

Personal Projects & Self-Learning

- Built and deployed ML-based web applications using Stream-lit and Python
- Built an ML-powered stock analysis tool using Python and Stream-lit
- Gained hands-on experience in Machine Learning and Data Analysis
